

VesselMan

Inspection App

Faster, Easier, More Accurate Inspections

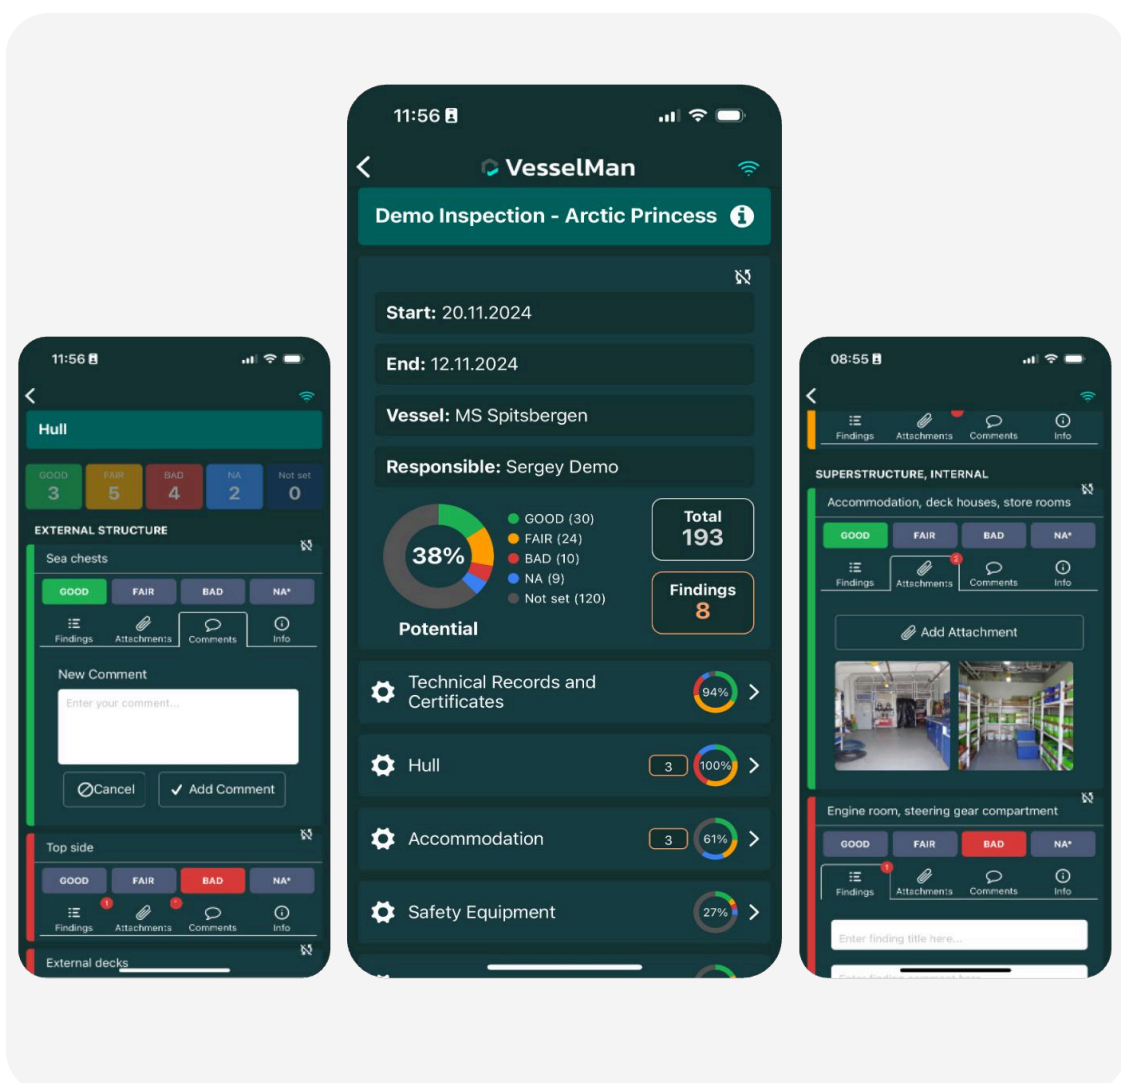

With increasing regulatory pressure and higher costs of non-compliance, the need for a digital, auditable, and collaborative inspection process is greater than ever.

Streamline Inspections

Build a central template library, standardise inspection checklists (ISM, RightShip, SIRE 2.0, and more), and deploy them across the fleet. Conduct inspections even offline via the mobile app—with automatic sync when reconnected.

Capture Findings, Images, And Comments On-Site

Log findings, attach images, and add comments directly from your mobile device—removing the need for separate cameras or transcription later. Findings can be tagged, prioritised, and linked to tasks for immediate action.

VesselMan Inspection App Empowers Maritime Teams To Digitise Inspections, Ensure Compliance, And Take Corrective Action Faster—Improving Safety, Reducing Risk, And Avoiding Costly Delays.

Link Inspections To Maintenance And Projects

Escalate findings directly into dry-docking projects or push them into your PMS for resolution—ensuring nothing is missed and creating full traceability from inspection to corrective action.

Real-Time Collaboration Between Ship And Shore

Inspection progress, open findings, and corrective actions are visible in a central dashboard for both onboard teams and shore-based management. Invite external partners or suppliers into the workflow when needed.

From Inspection Plan To Corrective Action In Six Steps

A streamlined workflow that turns findings into fixes—without duplication or delays.

Configure & Standardise

Build checklists in a central template library for consistent inspections across all vessels.

Assign & Prepare

Create an inspection project, assign templates, and delegate responsibilities to onboard or shore-based staff.

Execute Onboard

Capture findings, photos, and comments in the mobile app, with or without internet access.

Review & Escalate

Track open items, prioritise actions, and escalate critical findings into projects or PMS tasks.

Report & Share

Generate formatted PDF reports instantly for auditors, internal teams, or external stakeholders.

Analyse & Improve

Aggregate inspection data to identify trends, address recurring issues, and improve safety outcomes.

The Impact Across Your Fleet

- ✔ Reduce inspection time and admin workload
- ✔ Improve safety and compliance
- ✔ Ensure faster follow-up on findings
- ✔ Gain real-time visibility across vessels and teams
- ✔ Minimise the risk of missed issues or audit failures
- ✔ Enable smarter planning through fleet-wide analytics
