

# PortLog<sup>®</sup> Agent Request

PortLog can provide accurate cost estimates for 95% of your voyages. For the remaining 5% of locations, you may currently consult port agents. Our Agent Request feature bridges the gap between the digital and analogue worlds.

- Request PDAs and restrictions from 7,000+ agents covering 3,000+ ports
- View recommended agents based on proximity, port call volumes, terminal experience and commodity knowledge
- Contact the most suitable agents in every port
- Personalise your messages, select multiple vessels and add extra email addresses for up to three agents
- All with the support of PortLog, ensuring agents provide a response

The screenshot displays the PortLog Agent Request interface. On the left, the 'Agent Request' panel includes filters for 'Port Costs' (checked), 'Restrictions', and a location dropdown set to 'Southampton'. It also features buttons for 'Load' and 'Discharge', and a 'Quantity' dropdown set to 'MT'. Below these are commodity and terminal dropdowns, with 'Grains' and 'TBN Baltic Handysize (25000 - 44000)' selected. A 'Terminal' dropdown is also present. A 'Select a terminal to filter suitable agents' section shows a bar chart with 'Bulk Terminal' at 90%, 'Southampton Grain Terminal' at 9%, 'Berth 22' at 0%, and 'Canary Fruit Terminal' at 0%. The main 'Select Agent' panel lists various agents with checkboxes, star ratings, and columns for 'Recommendation', 'Performance', 'Votes', and 'Calls at Port'. Agents like 'Clarkson Port Services Ltd - Southampton' and 'Denholm Port Services Limited - Southampton...' are selected. A 'Preview Message' window is open, showing a message from 'Clarkson Port Services Ltd - Southampton' with the subject 'Southampton, Bulk Terminal cost and restrictions request from Blue Team Shipping A/S - TBN Index Handysize'. The message content includes a greeting, a request for port costs and restrictions for 20,000 MT of Grains, and a thank you note. At the bottom, a table shows vessel details: Vessel (TBN ...), DWT (38,2... MT), Draft (10.50 m), LOA (180.00 m), Beam (29.80 m), NT (11,8... MT), and GT (22,8... MT). A 'Copy message to all agents' button and an 'Add vessel' button are also visible.
