

FOR PRE-FIXTURE

PortLog[®] The world's largest port data platform

Should you be making quicker, more profitable fixture decisions using data and analysis over gut feel and instinct?

NEW

For dry & tanker

Veson IMOS-integrated

Use the 38.2m digitised events in PortLog to:

- Accurately estimate port costs and turnaround times
- Optimise intake with instant access to berth-level restrictions
- Identify fixture risks and opportunities, including seasonal impact
- Achieve sharper, faster freight pricing

How to improve your voyage estimates:

1. Port Costs

Access industry-benchmarked port cost data, discounts and cost drivers

2. Time in Port

Predict most likely terminal, benchmark terminal efficiency, view holidays, understand weather impact on laytime and estimate demurrage

3. Terminal Restrictions

Will my vessel fit? Access structured data on draft/LOA/beam, tide and daylight restrictions and port/terminal insights

Ongoing trend analysis to boost your internal learning loop
Plus quickly contact agents in a few clicks

“Data-based decision-making has changed massively with PortLog, preventing unpaid time from occurring.”

– Norden

“Having a tool that provides insightful data on each of your port calls enables you to see risk.”

– Lauritzen Bulkers
